## PROFESSIONAL SUMMARY

Emerging software engineer with a foundational project in CS50, demonstrating an intricate personal website that encapsulates bio, goals, and professional aspirations. Proficient in Python, C/C++, CSS, JavaScript, HTML, and SQL, showcasing a strong blend of technical skills and attention to detail. Eager to apply problem-solving abilities and organized approach to tackle complex coding challenges in a dynamic environment.

## EDUCATION

**Santa Rosa Junior College**, Petaluma, CA— *Computer Science*

Pursuing Bachelor's Degree

**Novato High School**, Novato, CA— *High School Diploma*

August 2018 - June 2022

## PROJECTS

Developed a personal website for CS50's course at Harvard, showcasing my bio, goals, and work, demonstrating meticulous attention to detail.

## HOBBIES AND INTERESTS

- **Computers:** I am passionate about exploring the latest advancements in technology and enjoy experimenting with coding projects, exploring new software, and learning about emerging trends in the tech industry. My curiosity drives me to continually expand my knowledge and skills in computer science.
- **Drawing:** Drawing is a big hobby of mine, allowing me to express myself artistically and indulge in creativity. I find joy in sketching both digitally and traditionally, exploring different techniques and styles to bring my ideas to life.
- **Playing Video Games:** As a gamer, I enjoy the immersive experiences and interactive storytelling that video games offer. I enjoy the freedom of decision making, solving puzzles, and
